## phoenix italia srl AL 120

## WIPE-ON APPLICATOR FOR PREPRINTED LABELS

AL 120 is a high performance applicator that combines the speed with the accuracy of the label positioning.

These features are obtained by means of a mechanism powered by two microprocessor driven stepping motors. With this configuration it is possible to mantain constant the web tension without any mechanical regulation. There are no clutches to calibrate or to maintain.

The speed is continuously adjustable up to $40 \mathrm{~m} / \mathrm{min}$ by means of a keyboard. It is also possible the connection to an external encoder to adapt automatically the feed speed to the conveyor one.

The microprocessor electronic calibrates automatically the fotosensor for an easy label size changement.

The unwinder accomodates 3 " ( 76 mm ) core label rolls with an external diameter up tp 12" (305 mm ) and a web width up to 120 mm .

Due to its high application speed the AL 120 can be used its on very fast conveyors too. It is very compact and the reduced thickness of only 245 mm allows an easy the integration in tight spaces. There are no external boxes, cables, consoles that complicate the installation and take extra room.

The external interface provides alarm and syncronization signals, so no other external devices are necessary.

Thanks to the "intelligent" drive of the stepping motors the power requrement are limited to not more than 120 W at full speed.

## TECHNICAL SPECIFICATIONS

| LABEL SIZE | $\min 20 \times 20 \mathrm{~mm}$, max $120 \times 250 \mathrm{~mm}$ |
| :---: | :---: |
| ROLL DIAMETER | up to 300 mm |
| SPEED | from 4 to $40 \mathrm{~m} / \mathrm{min}$ |
| PRECISION | +/- 0,8 mm |
| RIAVVOLGITORE | azionato da motore passo-passo e controllato da un microprocessore. |
| DISPLAY | DISPLAY: back lit dot matrix LCD, 2 lines of 16 characters and two LEDs |
| CONTROLS | 3 keys allow the guided programming of the functions and the parameters of the applicator |
| DIMENSIONS ( x h x w) | approx $700 \times 600 \times 245 \mathrm{~mm}$ |
| WEIGHT | approx 21 kg |
| POWER SUPPLY | 90-240 VAC, 50-440 Hz, 120W max |
| ENVIRONEMENT | temperature from 5 to $35^{\circ} \mathrm{C}$, relative humidity from 20 to $\mathbf{9 0 \%}$ (not condensing) |
| INTERFACE | syncronization, alarm and product sensing signals |

| P/N |  |
| :---: | :--- |
| $\mathbf{1 2 0 . 0 0 0} \mathbf{R H}$ | RIGHT HAND APPLICATOR |
| $\mathbf{1 2 0 . 0 0 0} \mathbf{~ L H}$ | LEFT HAND APPLICATOR |
| $\mathbf{1 2 0 . 5 0 0}$ | ENCODER |
| $\mathbf{1 2 0 . 6 0 0}$ | PAPER END PRE-WARNING |
