Model 2038 Printer Applicator

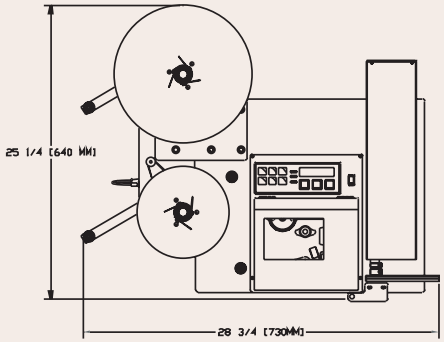
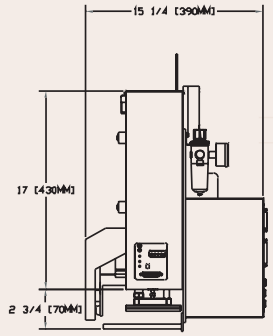
LABEL-AIRE

If versatility, portability, affordability, and reliability are features that you want in your printer applicator, look no further. The Label-Aire® Model 2038 fits the bill.

The Label-Aire Model 2038 Printer Applicator is a value-priced labeler that does not skimp on standard features. The 2038 uses a stepper-driven rewind assembly which ensures long print-engine life improving your bottom line in the long run. The 2038 can be easily modified to apply labels using tamp-on, tamp-blow, or air-blow labeling methods. The 2038's ability to apply labels at any angle, including top, side, or bottom to a wide range of products makes this a very versatile machine. The 2038 comes equipped with standard error diagnostic routines, monitoring minimum product spacing and label presence on tamp pad – which ensure that the correct label gets on the proper package – are standard features that are not usually found on a value priced printer applicator.

- Stepper-driven means "no wear parts".
- Labeling speeds up to 100 products per minute.
- Maximum label size of 4.75" (120 mm) wide x 6.7" (170 mm) long will handle a wide product range.
- Compatible with any O.E.M. printer brand on the market.
- Optional T-base stand allows ease of mobility among various production lines.
- Compact yet rugged design for easy placement into confined spaces.





Label-Aire also provides a full range of pressure-sensitive labelers, rotary, and inline systems to meet your toughest labeling requirements.
