

53LT - Reassurance through design and technical innovation

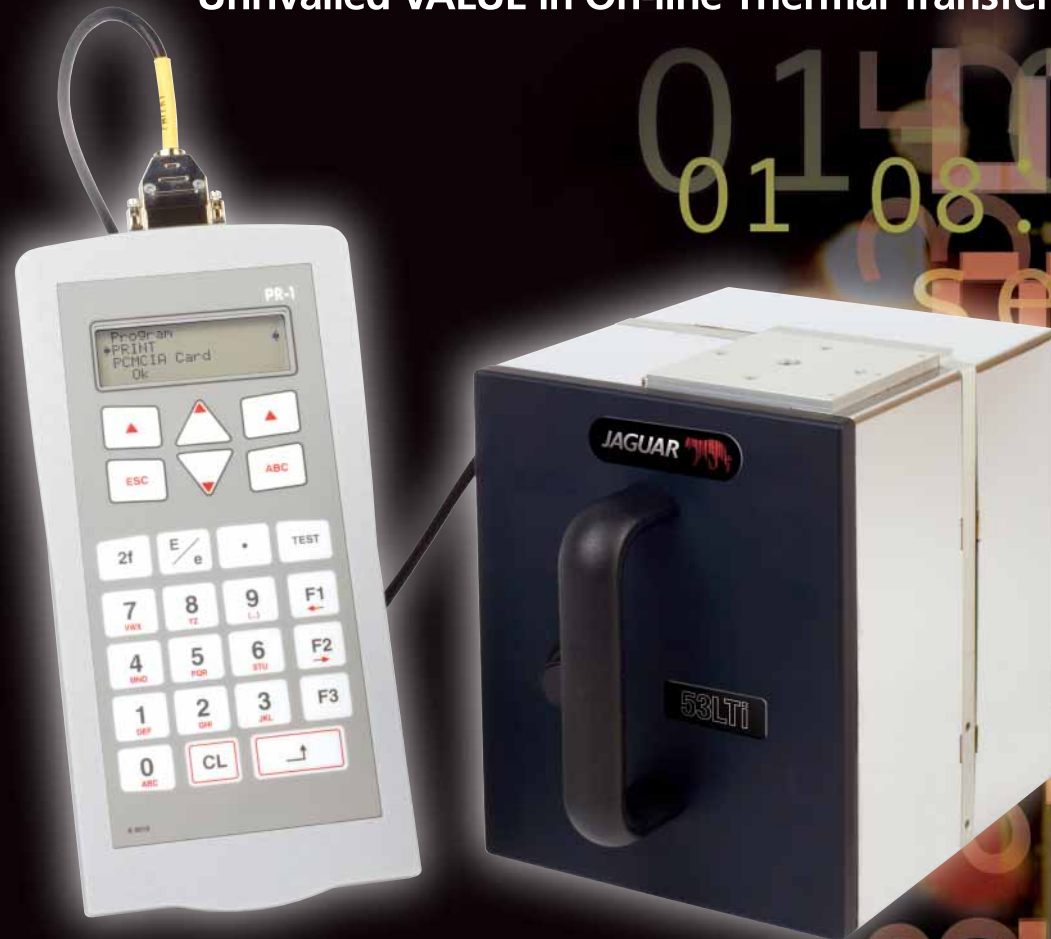

Unrivalled VALUE in On-line Thermal Transfer Printing

Coder Ownership Made Simple!

Operator friendly, state-of-the-art electronic coder. Ideal for reproducing bar codes, real time, sell-by dates, batch numbers, graphics, prices, source codes and much more, permitting the desired message to be selected within seconds via an easy to use keypad.

- Extensive options choice – don't pay for features you don't need.
- Future proof – upgrade to additional features easily and cost effectively.
- Based upon tried and tested technology – no risk.

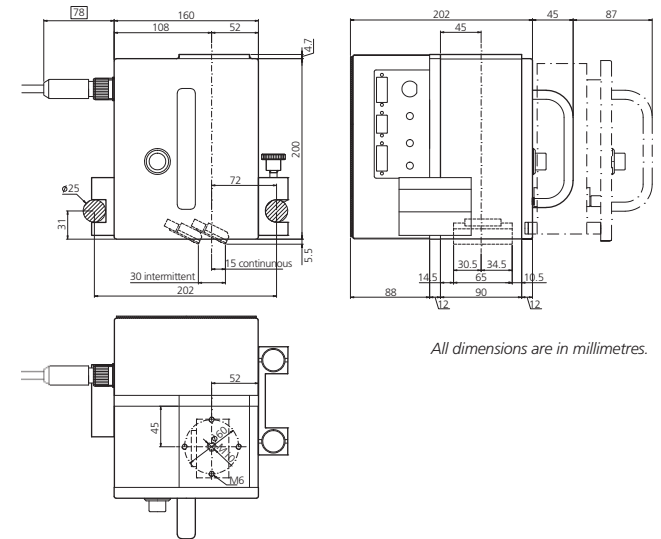

The **JAGUAR** range of on-line thermal transfer printers provides for intermittent and continuous motion in-line printing of variable information, enabling the direct application of product specific data directly on to a wide range of packaging materials.

53LT specifications

Print area:	53LTi	53 * 30 millimetres (intermittent motion)
	53LTc	53 * 50 millimetres (continuous motion)
Resolution:	12 dots/mm	
Printing speed:	up to 250 mm/sec	
Ribbon length:	600 meters mounted in cassette	
Weight (body):	7 Kg	
Internal database:	200 KBytes	
Internal scalable fonts:	3	
Internal fast fonts:	1	
Downloadable fonts:	1 (in future)	
Air supply:	6 Bar maximum	

Power supply:	85~264VAC 47~63Hz 250 Watts
Outputs:	Failure printing device Enable printing cycle Free/Busy device
Inputs:	Print signal input
Communications:	RS232 Ethernet with external module (not supplied)

All dimensions are in millimetres.
